

## NOTICE OF INTENT

### Village of Cass City – Water and Sewer System Improvements

The Village of Cass City intends to file an application for funding for the proposed project with USDA Rural Development.

- **Name and contact information of legal applicant.**

Village of Cass City

6505 Main Street

Cass City, MI 48726

- **Need for project:**

The residents of Cass City have aged water mains, lack of redundancy, and potentially reduced pressures in some parts of the Village. Since the Village has plans for repaving North and South Seeger Streets, Third Street and Bulen Drive in place, now is the best time for infrastructure improvements below the street, before new pavement is installed.

- **Scope of the project:**

The water and sewer system improvements will serve Village residents and businesses in the following ways:

- Replacement of undersized/aged water mains.
- Addition of a loop eliminating a dead end main and potentially improving water quality.
- Replacement of sewer crossings across south Seeger St will eliminate failures and need for excavation in the near and midterm.

- Estimated amount of project: \$1,300,000

- Timeframe of project: Spring 2021 through Fall 2022

**Motion:** To approve the Notice of Intent to apply for USDA Rural Development funding for the Seeger Street water and sewer system improvements during Spring 2021 and Fall 2022, in the amount of \$1,300,000.
